

## CLARIS PRIME - THE FACTS

**Removes cations and anions to effectively protect equipment from scale formation and chloride/sulphate induced corrosion.**

- High capacity multi stage filtration technology in one compact filter cartridge system
- Features Duoblend bypass technology for accurate adjustment of total hardness levels including sodium, potassium and corrosive chloride and sulphate anions
- Ultra technology provides outstanding filtrate hardness stabilisation for maximum control of calcium and magnesium
- Maximum TDS reduction protects steam ovens from scale and mineral induced corrosion in regions with high chloride and sulphate content in the feed water
- Features five micron carbon block membrane for the effective removal of microparticles and taste & odour
- Reduces harmful inorganics and organics
- For vertical and horizontal installation

**High capacity multi stage filtration technology in one compact filter cartridge system**

## Gen2 filter head - THE FACTS

**Easy to install, easy to maintain.**

- Simple cartridge replacement (45° turn only)
- Small space requirement
- Internal Bypass setting protects against accidental user adjustment
- Ergonomic design
- Multi valve head with 6 to 7 valves for safe and convenient maintenance. Easy flush and de-aeration, inlet-outlet shut off, pressure release valve, Duoblend bypass twin-valve technology
