

# CHILLTECH

## HEAT EXCHANGER

- **Requires NO electricity**
- **Make 30% more ice**
- **Reduces cycle times**

The Exclusive ChillTech™ System will significantly reduce water temperature to incoming ice makers. This will reduce ice maker cycle times while increasing the ice-making capacity of the ice maker up to 30%. All of this...with no electricity used!

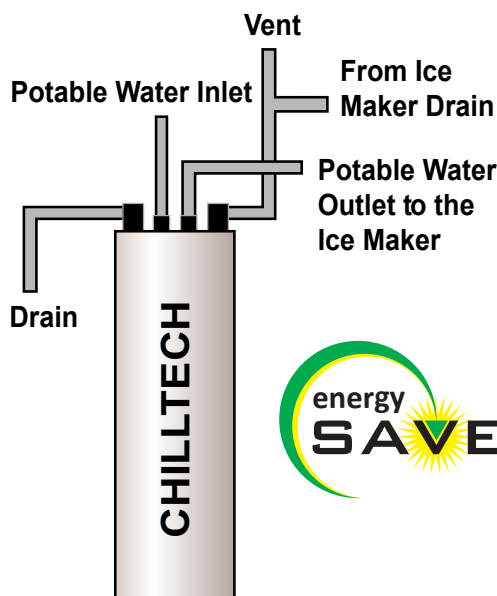

The ChillTech™ not only reduces freeze times, but also increases harvest weight, which in turn reduces the amount of water purged at cycle's end. This means a highly reduced kWh consumption per 100 pounds of ice and a reduction in gallons of water used per pounds of ice harvested.

- 2 year warranty
- Increase production up to 30%
- Lowers kWh consumption up to 30%
- Easily connects to cold water feed line
- Self cleaning and maintenance-free
- No moving parts or electrical hook-up

- Maximum Pressure : 100 psi •
- Maximum Temperature: 100° F •
- Inlet/Outlet: 1/2" •
- Flow Rate: 5.5 gpm •
- Dimensions: 5" W x 28.5" H •
- Shipping Weight: 18 lbs •

The higher the incoming water temperature, the more effective the ChillTech™ is, giving you a more efficient ice maker...saving you money, energy, time...and the environment!

For icemakers up to 4000 lbs.

### ACCESSORY PARTS

Braided Stainless Steel Water Supply  
Part No. BSS-2312

Brass Compression Union  
Part No. CUC-38
