INTRODUCING

ℭstreamlabs®

SMART HOME WATER MONITOR
Stay in sync with your water.

streamlabswater.com

THE STREAMLABS® WATER MONITOR is the ultimate solution for tracking your water consumption and providing real-time alerts to possible leaks. The Streamlabs water monitor will easily pay for itself by alerting you to a running toilet, dripping faucet/shower or leaking hose bibb/water heater. Installation typically takes less than 15 minutes. Water consumption alerts are fully customizable for your home's needs. Home/away mode provides an added layer of security by immediately notifying you of any detected water flow while you are away from home.

KEY BENEFITS

- Streamlabs App provides real-time water consumption alerts

- Easy installation, no tools or pipe cutting required

- Integrates with Nest and Amazon Alexa

- Compatible with 3/4" and 1" PEX, Copper, and CPVC pipe.

- No smart home hub required

- No recurring fees or monitoring costs

- Single device monitors entire home – no need for additional sensors

- Home/away mode provides added layer of protection by notifying you of any water flow while away from home

- Tracks historical water usage and trends
