

Alkaline Water Filter

The neoPure™ ALKA-2510 Alkaline Water Filter Cartridge is designed as a post-filter for reverse osmosis systems. Featuring a specialized 6-media mineral blend, the cartridge conditions RO-treated water to increase pH and lower oxidation-reduction potential (ORP). Its standard slimline design provides a convenient final conditioning stage for compatible RO systems.

Features:

- 6-Media Mineral Blend
- Alkaline Water Conditioning: Helps increase pH and lower ORP in RO-treated water.
- Standard Slimline Design: Fits compatible standard slimline filter housings.
- RO Post-Filter: Designed as a final conditioning stage for reverse osmosis systems.

NOTE: Cannot be used as a standalone alkaline ionized water filter.

Based on manufacturer's internal testing. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

PRODUCT SIZE CHART

Max Flow Rate
0.035 - 0.5 gpm

Capacity
1,000 gal

Min Pressure
125ps

Filter Media
ORP Ball
Red Far Infrared BIO
Ceramic Ball
White Far Infrared BIO
Ceramic Ball
Tourmaline Ball
Calcor and
Magnetic Energy Ball

Dimensions:
2-1/2" OD x 9-7/8" L
