

4" BULKHEAD FITTING
P/N 62171

- The fitting assembly includes body, nut and EPDM gasket.
- Use with siphon tube P/N 62714.
- The siphon tube will need to be cut to the proper length depending on the fitting mounting height and the tank bottom thickness. Allow 1-1/2" minimum clearance between bottom of siphon tube and inside bottom of tank.
- Install fitting in 5-3/4" diameter hole.
- Use with tanks that have a thickness from 0 to 1-3/4".
- For vertical tanks with diameters of 87" or greater, install in curved wall.
- For vertical tanks 87" diameter and greater and up to and including the 11,000 gallon, install the center of the fitting at least 9" above the outside bottom. For tanks 12,000 or larger, consult Norwesco for fitting placement.
- Tighten fitting nut to 100 ft-lbs torque.
- To install in a 5025 or larger Horizontal Leg or 2635 or larger Elliptical Leg tank, consult Norwesco for fitting placement.
