

Big Flow Filter Housings

neoPure Big Flow Filter Housings are manufactured of a durable polypropylene with 3/4, 1, or 1-1/2 NPT ports. Housings are available in 10" and 20" lengths and will accommodate a wide range of 4-1/2" diameter cartridges.

The reinforced polypropylene cap offers an optional pressure-relief button on the inlet side to relieve pressure inside the housing when changing filter cartridges.

Reinforced polypropylene housings have excellent chemical resistance and are ideal for many residential, commercial and industrial applications.

Opaque Big Flow Filter Housings are molded from rugged reinforced polypropylene. They offer outstanding chemical compatibility and are ideal for use in a variety of applications.

PRODUCT SPECIFICATIONS

Max Temperature
100°F (37.7°C)

Max Pressure
100 psi (6.8 bar)*

Materials of Construction

Cap: Polypropylene
Opaque Sump: Polypropylene
O-Ring: Buna-N

Tested and Certified

This housing is Tested and Certified by NSF International against NSF/ANSI Standard 42 for material and structural integrity requirements.

COMPONENT

NSF/ANSI Standard 42 Certified for material safety and structural integrity only

APPLICATIONS

- Reverse Osmosis
- Residential Plumbing
- Photography
- Beverage
- Ice Maker
- Misting Systems

*Temperature ratings vary and depend on pressure and time under load

Big Flow Filter Housings
