

The sanitizing rig allows for a quick and efficient way to move sanitizing solution or chlorine into the storage tank(s) and through tubing to ice makers or other remote hook ups.

Often overlooked or by-passed due to complexity, this makes the sanitizing process simple and easy enough that an important step in periodic maintenance is completed.

The sanitizing rig can also be an important trouble shooting tool in diagnosing system performance issues.

	Description	Qty
1	Pressure Gauge 2" 100 psi 1/4" NPT Lower Mount	1
2	NeoFit Female Adapter 1/4 x 1/4 NPT Black	1
3	NeoFit Stem Run Tee 1/4 Black	1
