

salt

Pool Check™ Salt is designed to be the most versatile Sodium Chloride test strip available today. With its wide range of detection, Pool Check™ Salt is ideal for any chloride generating unit available, no matter what the recommended level. Additionally, Pool Check™ Salt uses a unique 3-pad color coded system for determining accurate results; taking the guesswork out of color matching.

Test Procedure:

Simply dip one test strip into your pool or spa for **2 seconds**. Remove the strip and shake once, briskly to remove excess water. **Wait 20 seconds** for colors to develop. Compare test pads with color chart on the bottle **within the next 20 seconds** for best results.

Detection Range:

Sodium Chloride: 1500, 2000, 2500, 3000, 4000, 5000, 6000, 7000 ppm

Packaging:

Bottle of 16 test strips

Available In Multilingual Packaging With Translated Instructions. Languages Include: English, French, German, Italian, Portugese, & Spanish.

Also Available For Private Label.
