

SUPERBLEND ORGANIC WASTE DIGESTER FOR DRAIN AND SEPTIC APPLICATIONS.

MegaMicrobes® SuperBlend is a bio-enzymatic plumbing and septic tank maintenance product containing high levels of friendly bacteria, enzymes, buffering and nutrients in a synergistic, proprietary formula designed to degrade heavy organic deposits including fats, grease and oils. It is **environmentally friendly, non-toxic** and **highly cost-effective** across multiple applications from residential plumbing and septic tanks to restaurants to commercial and municipal facilities.

Regular treatments with MegaMicrobes have been shown to **significantly reduce maintenance costs** associated with repairing clogged pipes and drains, restoring leach fields, jetting lines, and need to frequently pump out solid waste in tanks.

MEGAMICROBES SUPERBLEND IS SUPERIOR TO OTHER BIOLOGICAL TREATMENTS IN STRENGTH AND FORMULATION:

- 1 Extra-Cellular Enzyme System** SuperBlend contains a full complement of 4 primary enzymes: **Amylase** to break down starches, **Cellulase** to break down papers and fibers, **Lipase** to break down FOG (fats, oils and grease) and **Protease** to break down proteins. Additional enzymes are secreted by the bacterial cells as they multiply.
- 2 Synergized Bacterial Blend – 8 strains** MM SuperBlend utilizes a synergized blend of both Pseudomonas and Bacillus organisms selectively adapted for maximum FOG digestion and to withstand high strength/toxic waste streams, including hydrocarbon-derived cleaning agents.
- 3 High Cell Counts** – Industry-leading microbial cell counts of 2 billion CFU/gram extend the productive cycle of each application.

WHERE TO USE MEGAMICROBES SUPERBLEND

- All types of drains & pipes – completely safe for all materials
- Septic tanks & leach fields
- Grease traps
- Residential plumbing, including multi-story buildings
- Medical facilities
- Composting
- Toilet holding tanks, including dry wells
- Livestock waste ponds

SUPERBLEND ORGANIC WASTE DIGESTER FOR DRAIN AND SEPTIC APPLICATIONS.

AVAILABLE PACKAGING:

25-POUND BULK POWDER (11.33 KILOGRAM)

- Ideal for variable dosages, most economical packaging

WATER SOLUBLE PACKS (227 GRAMS)

- Pre-measured, easy drop & dissolve in sink or tank
- Pre-measured dosages sold in bucket lots of 50 8-ounce (227 gram) packets or 100 4-ounce (113 gram) packets

CONSUMER PACKAGING

- For retail sales or distribution to individual members of residential communities
- Samples shown are available in case lots
