

2020
Marshall Islands Development
Performance Report

I. Overview

The Marshall Islands Development Performance Report (MIDPR) provides a comprehensive overview of the country's economic and social performance in 2020. The report is organized into four main sections: Overview, Economic Performance, Social Performance, and Environmental Performance. The Overview section provides a summary of the country's key indicators and trends. The Economic Performance section details the country's GDP, inflation, and other economic indicators. The Social Performance section discusses the country's social indicators, including literacy rates, health care, and social services. The Environmental Performance section examines the country's environmental indicators, such as air quality, water resources, and biodiversity.

II. Economic Performance

Indicator	2019	2020	2021	2022	2023
GDP (USD million)	1,200	1,150	1,250	1,300	1,350
Inflation (%)	2.5	2.0	2.2	2.1	2.3
Unemployment (%)	15.0	14.5	14.8	15.2	15.5

III. Social Performance

The Marshall Islands has made significant progress in improving its social indicators over the past decade. The country's literacy rates have increased from 75% in 2010 to 85% in 2020. The health care system has also improved, with a decrease in infant mortality rates and an increase in life expectancy. The social services sector has also seen growth, with increased funding for education, health care, and social welfare programs.

IV. Environmental Performance

The Marshall Islands is a small island nation with a limited natural resource base. The country's environment is vulnerable to climate change, sea level rise, and other environmental threats. The government has implemented a number of measures to protect the environment, including the establishment of national parks, the implementation of environmental impact assessments, and the promotion of sustainable development practices. The MIDPR provides a detailed overview of the country's environmental performance and identifies areas for improvement.
