## Personal Gravity Water Filter System

AquaCera  
Doulton ceramic technology inside

The Traveler personal gravity water filter has been specifically designed for travel and the outdoors. The water in the upper chamber passes through the Doulton® SuperSterasy™ filter candle into the lower chamber where the filtered water is collected. The unit is made from high grade polished stainless steel and is extremely compact, small enough to take anywhere yet able to provide the cleanest, safest drinking water possible in any situation or location around the world.

World renowned Doulton® ceramic filter technology with over 150 years of quality manufacturing

For use with municipal or natural water sources

Ideal for travel, camping, emergency relief, everyday use

Saves money over expensive bottled water

Total capacity 2 Liters (upper & lower chambers combined)

Unit comes complete with a carrying bag

Filters out:

- Pathogenic bacteria (cholera, typhoid, salmonella, E coli, etc.)
- Giardia, Cryptosporidium, and other parasites
- All types of particle contamination down to 0.5 Micron
- Removes chlorine, taste, odor, herbicides & pesticides

Highly portable, lightweight, and durable

Easy to use, simple to maintain. Filters can be cleaned up to 100 times

Pour untreated water in the top and get clean, filtered water from the bottom chamber

No power required
