—

We keep bugs away the friendly way. NatureShield Insect and Pest Repellent is a concentrate made of natural oils, and it works like a citronella candle to create a yard barrier for flying and crawling insects. Use it to help deter mosquitoes, fleas, fire ants, biting midges (no-see-ums), and more. Enjoy your backyard and outdoor space with fewer insects by applying the solution automatically through a sprinkler system equipped with an American Hydro Systems Feeder or apply it manually through a hose or sprayer. Made in the USA, use it on lawns, pool decks, private campsites, and ponds to help repel bugs and regain control of your outdoor oasis. It's easy to use and easy on the environment, too. Made of essential oils, cedar, and cinnamon, the Mother Nature-approved formula does not harm plants, bugs, pets, pollinators, or humans when used as directed. Please read full instructions before using. Not for use indoors, in or around food or feed crops, and in treatment areas where bees or pollinators are foraging.
