

Maintenance

Cartridge changeout schedule

1. When the line pressure downstream of the filter housing drops to 30 psi or below during system operation, the cartridge(s) needs to be replaced.

Occasional dips below 30 psi and back are normal.

2. Attach laminated cartridge change out procedures to wall next to filter system at a level that is easy for viewing.

3. For Ordering information for cartridge replacements see Specifications.

Specifications

Model M-5

Specifications:

- Rated Capacity (Chlorine): 5,000 gallons
- Flow Rate: 2 gpm
- Min/Max Pressure: 40–125 psi.
- Min/Max Temperature: 40°–100° F
- Inlet/Outlet Size: 3/4 Inch NPT
- Shipping Weight: 5 lbs.
- Dimensions (W/D/H): 14/7/20"

Applications

1 carbonator

System Part:
#05-210

Replacement Cartridge:
CB Filter #101-210
