

# Vortech™ Systems by Watts

Revolutionary new distribution technology

## Features & benefits

- Up to 30% less backwash flow rate is required.
- High flow design maximizes today's high efficiency valve technology.
- Permanent attachment of dip tube to distributor, so when servicing a valve, distributor stays in place, no more re-bedding.
- Vortech distributor plate is designed for over 6,500 lbs load capacity.
- Elimination of gravel, save on net cost and unit weight, for shipping.
- Universal plate for use in filtration and softening applications.
- Self-cleaning nozzle design.
- Available for 7", 8", 9", 10", 12" and 13" 14" tanks; 1" and 1-1/4" valves.
- Increase in softening capacity, due to improved flow through media.
- No channeling of media, providing a cleaner more efficient system.
- Optional secondary distributor plate for dual media systems without additional tanks, valves or efficiency reducing media migration.
- Environmentally friendly, reduction in required backwash times due to improved bed lift at lower flow rates.
- Most efficient softening regeneration, reducing salt consumption.

**Vortech™ is the latest, most innovative, and most efficient bottom distribution system.**

**The Vortech's high flow design maximizes today's high efficiency valve technology.**
