

Refillable Cartridge Assembly

The refillable cartridges are packaged for companies that fill them with media, then shrink wrap them for resell. There is a sheet of shrink wrap film and a label inside that you will not need and can be discarded.

Some of the caps have a label that states: **Please don't open this cap** - Please disregard

The components you do need are;

- Foam pad
- Gasket seal
- Cartridge housing and Cap

Assembly Instructions

1. Remove contents of the media housing that will include a foam pad, gasket for use on the top of the cap and the media
2. Pour the media into the housing. The amount of freeboard, or space between the top of the media and cap is determined by the media.
3. Place the foam pad into the top of the housing
4. Replace the cap
5. Insert the entire refillable cartridge assembly, cap side up, into the filter housing place the gasket on the top.
6. Re assemble the filter housing and slowly turn the water back on.
