

WaterMaker^{MINI}

Faucet-Mounted Residential Reverse Osmosis System

- ▶ The first faucet-mounted reverse osmosis drinking water system.
- ▶ Now with high flow 20 gpd membrane.
- ▶ Reverse osmosis membrane reduces total dissolved solids (TDS) by 96%.
- ▶ Compact design attaches easily to the kitchen faucet. Simply detach it and store in the refrigerator when not in use.
- ▶ No permanent plumbing connection. No tools required.
- ▶ Great tasting drinking water for pennies a gallon.
- ▶ Less expensive than bottled water with no plastic waste.
- ▶ Top quality coconut carbon post-filtration provides final polishing for the freshest taste.
- ▶ Easy to maintain. Replace the membrane cartridge without tools.
- ▶ Perfect for apartments, vacation homes and RV's.
- ▶ Includes quick-connect aerator and tubing.
- ▶ Optional carbon post-filter, diverter valve and counter-top stand available.
- ▶ Manufactured in the USA.

FAUCET-MOUNTED REVERSE OSMOSIS

The WaterMaker Mini reverse osmosis system produces high quality drinking water simply and easily. There are no heavy bottles to lift, no trips to the store and no permanent plumbing connections required.

USING THE WATERMAKER MINI

The WaterMaker Mini attaches quickly to your kitchen faucet. Tap water will circulate through the unit. Fresh water will flow slowly from the tubing. Collect the fresh water by directing the tubing into a pitcher or other container. When the container is full, detach the system and store it in the refrigerator until next use.

FEED WATER REQUIREMENTS

Total Dissolved Solids (TDS)	<2,000 mg/L (ppm)
Feed Temperature	40° F-100° F
Feed Pressure	40-80 psi
Turbidity	<1 NTU
Silt Density Index	<5
pH	4-8
Chlorine	<1.0 mg/L (ppm)

Feed water must be potable. Must be free of potential membrane foulants such as Iron, Hydrogen Sulfide and Manganese.

WaterMaker Mini with optional carbon post filter.

ACCESSORIES AND REPLACEMENT PARTS

Product	Description	Part Number
Membrane	Replacement reverse osmosis membrane.	104467
Digital TDS meter	Hand-held digital meter displays total dissolved solids (TDS) in feed water or drinking water in parts per million (ppm).	100877
Carbon post filter and support ring	Further polishes drinking water after the WaterMaker Mini reverse osmosis process. Replace every three months.	104127
Countertop stand	Allows you to place the WaterMaker Mini on your countertop while the system is in operation. Use with the diverter valve.	104128
Diverter valve	Attaches to the faucet. Allows faucet use while the WaterMaker Mini is in operation. Use with the countertop stand.	104152
Quick-connect aerator	Replacement for aerator provided with system.	100274
Tubing	(2) 18" pieces, replacement for tubing provided with system.	104053
