

HDPE GROUND PROTECTION MAT

Ground Protections Mats are used to create a portable roadway or working platform for vehicles while providing traction for tracked or wheeled construction equipment. Ground Protections Mats are a superior replacement for plywood or fiberglass.

Made from 100% Recycled Material, these mats have a smooth backside for easy cleanup and the reverse side has a diamond tread for traction. They are completely waterproof and resistant to mold, mildew, and rot. Conveniently placed integrated handles make these mats easy to transport between jobs.

SPECIFICATIONS

- UV Resistant
- Connectors - Using provided holes at each corner stake to the ground or to adjacent mats.
- Weight Load Rating - Equipment up to 120 ton
Can vary depending on sub surface.
- Tread - Diamond tread for traction, reverse side smooth

APPLICATIONS

- Ground Protection
- Rutting Prevention
- Oil, Gas, & Water Well Drilling
- Temporary Access Roads
- Farm Machinery
- Construction
- Work Platforms
- Construction Sites
- Staging Areas
- Plumbing
- Containment
- Aviation Landings
- Heavy-Haul Applications
