

Alcantara® Microfibre®

Alcantara® Microfibre® is a high-performance, synthetic material made from ultra-fine fibers. It is known for its exceptional durability, soft touch, and ability to resist stains and odors. The material is commonly used in automotive interiors, particularly for seats and door panels, as well as in professional and military uniforms. Its unique structure allows it to maintain its appearance and performance over time, even under heavy use and exposure to various environmental conditions.
