

Get More Out of Your PRO!

LightWise™ Upgrade Kits are now available.

PRO systems have evolved significantly since becoming the very first UV product certified to NSF Standard 55 Class A.

With our latest upgrade kit, you gain the most advanced enhancements in UV disinfection technology with the equipment you already own.

LightWise technology with a flow meter **dramatically decreases sleeve maintenance and low UV alarms.**

LIGHT
WISE 

Benefits

- Up to **60% less** sleeve maintenance
- Significant reduction in low UV alarms
- Estimated **30% energy savings**
- Significant \$ savings
- Environmentally-friendly design
- **30% lower temperature** in extended periods of no water flow
- Reduced hot water shot on initial flow
- Extend the life of your existing system
- New **5 year warranty** on the electronic controller

The **LightWise upgrade kit** is an economical way to enhance your existing PRO system to the latest technology, extending the life of your equipment at a fraction of buying new.

Flow-Meter

The flow-meter converts flow rate readings to a 4-20mA signal, which in conjunction with the UV sensor's 4-20mA signal, is used to calculate the actual real-time UV dose.

LightWise Technology™

Allows the electronic control system to lower the power during periods of no water flow, leading to energy savings. This technology allows for a substantial reduction in sleeve fouling.

Upgrade kits are available immediately, and can be ordered using the following part numbers:

System Model #	PRO10 (650647/650650)	PRO20 (650653/650656)	PRO30 (650659/650662)
Upgrade Kit #	650730-004	650730-005	650730-006

For PRO systems that already include a flow-meter, contact VIQUA about upgrading the power supply/controller only.
